

## Gender of Non-living Things

You may not know this, but many non-living things have a gender. For example:

**FREEZER BAGS** are male because they hold everything in, but you can see right through them.

**PHOTOCOPIERS** are female because once turned off, it takes a while to warm them up again. They are an effective reproductive device if the right buttons are pushed, but can wreak havoc if you push the wrong buttons.

**TIRES** are male because they go bald easily and are often over inflated.

**HOT AIR BALLOONS** are also male, because to get them to go anywhere, you have to light a fire under them, and of course, there's the hot air part.

**SPONGES** are female because they are soft, squeezable and retain water.

**WEB PAGES** are female because they're constantly being looked at and frequently getting hit on.

**TRAINS** are definitely male, because they always use the same old lines to pick up people.

**HOURGLASSES** are female because, over time, all the weight shifts to the bottom.

**HAMMERS** are male because in the last 5000 years, they've hardly changed at all, but are occasionally handy to have around.

**THE REMOTE CONTROL** is female. Ha! You thought it would be male, but consider this: it easily gives a man pleasure, he'd be lost without it, and while he doesn't always know which buttons to push, he keeps trying!
